## Quick Start Guide For Pairing With iOS Devices

Printed in China Part No. 480-777-P Version A

**NOTE:** This device complies with part 15 of FCC rules: Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received including interference that may cause undesired operation.

**CAUTION:** Modifications or parts not approved by Cobra Electronics Corporation may violate FCC Rules and void authority to operate this equipment.

Use this instruction sheet for pairing with iOS devices. If you have an Android™ device, use the other quick start guide included in this package.

Cobra iRadar uses **Bluetooth®** wireless technology to connect your iPhone®/iPod touch® to display radar alerts and change settings.

Follow these simple steps to get your Cobra iRadar up and running.

### Cobra iRadar is made for:

iPhone 4S

iPhone 4

iPhone 3GS

iPod touch (4th Generation)

iPod touch (3rd Generation)

**NOTE:** \*Location-based alerts and GPS settings available only with iPhone.

Only radar/laser alerts and settings will work with iPod touch.

### Connecting with Cobra iRadar

Plug in your Cobra iRadar detector unit using the included cigarette lighter adapter.

Turn unit on. A red LED will light. Make sure the iOS/Android toggle switch is switched towards the **white** circle. This will allow the unit to communicate with your iPhone or iPod Touch. When switched toward the green circle, your iRadar will only communicate with Android devices.

On your iPhone/iPod touch, enter the **Settings** menu.

**iRADAR** should appear under **Devices**.

**Note:** Your iPhone/iPod touch may take 30 seconds to 1 minute to recognize the device.

It will initially appear as **"Headset"** and will then turn into **iRADAR**.

If you cannot see the device, try restarting both iRadar and your iPhone/iPod touch and re-do steps 1 through 5.

Press **iRADAR**, then press **Pair**.

The LED on the detector unit will flash blue. When pairing has been completed, it will turn solid blue.

### Bluetooth Pairing Tips

If you are having trouble initializing or maintaining your Bluetooth connection take the following steps:

- 1) Turn off your Cobra iRadar detector device, wait 30 seconds, and then turn it back on. On your iPhone/iPod Touch, turn Bluetooth Off and then On again.
- 2) If you are still not connected, go to the Bluetooth Settings menu on your iPhone/iPod Touch. Press the button to the right of iRADAR and then press "Forget this Device". Wait approximately 30 seconds for iRADAR to appear under Devices and then press iRADAR to reinitialize pairing.

3) If **iRADAR** does not appear under Devices or you experience an intermittent Bluetooth connection, completely turn off both your iPhone/iPod Touch and iRadar detector unit, wait 30 seconds, and then turn them back on.

- 4) If **iRADAR** still does not appear, switch the unit into Android mode and then back to iOS mode.

### Cobra iRadar App

To download the App, enter the App Store on your iPhone/iPod touch and search for "**Cobra iRadar**" and follow the onscreen instructions.

Now open the App and enjoy using iRadar!

### Dashboard

Display speedometer, compass and car battery voltage.

### Settings

Configure your Cobra iRadar settings.

**Note:** All radar/laser/red light camera detector settings will be inactive if you are not paired with Cobra iRadar or are out of range.

### View Map

View user-marked locations, red light camera locations in your area and GPS-based speed & direction of travel.

For more detailed information on iRadar App features, view the **tutorial**; which can be found at the bottom of the map legend page.
